NEW DESIGNS AND SIZES ADDED TO THE MODERN SURFACES COLLECTION

BULVERDE, TX (November 1, 2007) - Dunis Studios Modern Surfaces Ceramic Tile Collection is a unique group of relief architectural finishes. Each hand-cast and hand-painted tile is a different surface texture: wire grid, corrugations, washers, bolts, stucco and more different textures in over-sized shapes. Designed to be used as an overall wall surface or as running borders. Modern Surfaces are available in any of Dunis Studios 300 Field Tile colors, or in custom colors. Specify Modern Surfaces for a clean architectural look, with a touch of fun! This collection was created to give playful, colorful choices in industrial motifs. Modern Surfaces can be made frost-resistant for exterior and water-feature use in all climates.

Dunis Studios has created six new additions to the popular tile collection, including decorative borders, a rhombus, circles, and an over-sized checkered tile. These designs give a wonderful alternative to the sometimes mundane tile choices in today's market. They can also be ordered in any of Dunis' 300 plus color selections. Check out the Dunis Studios online catalog at www.DunisStudios.com and add a splash of color to your next tile project.
