## Topography Series I - New Directions in Art Tile

Asymmetrical Diamonds in Matte Charcoal

Dunis Studios introduces the designer tile collection Topography Series I. Premiering at Coverings 2008, in Orlando, Florida, Topography features tile as Fine Art - Ultra modern, minimal, sculptural. Clean architectural shapes form bold, dimensional wall sculpture. Twenty ceramic designs are available in over 300 colors; each is hand-cast and hand-glazed.

Designed and made exclusively by Dunis Studios, one of the leading art tile design companies in the US.

Just outside San Antonio, Texas, Dunis Studios has created handmade art tile for over fifteen years. Their atelier tile collections are nationally represented by upscale tile/stone showrooms. Showroom locations are available online at [www.DunisStudios.com](http://www.DunisStudios.com).
